

Priorities for this Health & Safety Course

I identify the main H&S hazard faced by your members	
I involve members by raising H&S awareness & TU involvement	
I improve H&S by introducing plans to control hazards	
Use information and the law effectively	
Getting things done by using own TU and negotiating with employer	
Develop skills to do an effective job as a safety rep	

Discuss these issues in your group and agree a score for each - 6 points for the most important, 1 point for the least important. Within your group you should all agree each score - debate them until consensus is reached.
